+ ABOUT US

Adams Traffic Management Services is a privately owned, family-run business established in 1990 by David and Kerrye Adams, now one of Australia's longest operating traffic control companies.

ATMS has built a reputation for delivering reliable, compliant and well-coordinated traffic management across Sydney, the Central Coast, Wollongong and the Blue Mountains.

Our team provides 24/7 emergency response and on-site support, responding quickly to urgent call-outs and ensuring projects remain safe, controlled and progressing without delay.

What sets ATMS apart is our fully in-house service delivery. From traffic guidance schemes, management plans and permits through to on-site implementation, every stage is managed by our team. This provides complete consistency, accountability and clear communication, reducing risk and simplifying project coordination for our clients.

We understand that traffic management is not just a requirement, but a critical part of how projects operate in real environments. By working closely with contractors, project managers and stakeholders, we deliver practical, well-structured solutions that align with site conditions, staging and timelines while maintaining the highest standards of safety for workers, road users and the public.

RELIABLE TRAFFIC MANAGEMENT, DELIVERED WITH EXPERIENCE, ACCOUNTABILITY AND A CLEAR UNDERSTANDING OF HOW PROJECTS RUN IN THE REAL WORLD.

+ THE ATMS DIFFERENCE

EVERYTHING MANAGED IN-HOUSE

From planning and approvals through to on-site delivery, ensuring consistency, accountability and clear communication across every stage.

FAST, RELIABLE TURNAROUND

Traffic guidance schemes and documentation delivered efficiently to keep projects moving without delay.

24/7 AVAILABILITY

Accredited Traffic Controllers, equipment and support available whenever your project requires it.

HIGHLY EXPERIENCED TEAM

Decades of hands-on experience operating across complex and high-risk environments.

FULLY INSURED AND ACCREDITED

Operating to recognised standards across safety, quality and environmental management.

STRONG AUTHORITY RELATIONSHIPS

Efficient handling of permits, approvals and liaison with councils and governing bodies.

+ END-TO-END TRAFFIC MANAGEMENT, DELIVERED IN-HOUSE

ATMS manages every stage of traffic management internally, from initial planning, traffic guidance schemes and permit approvals through to on-site delivery and ongoing coordination.

This fully integrated approach provides complete visibility across the project lifecycle, ensuring consistency, faster response times and clear communication at every stage.

By removing reliance on external providers, we maintain control over quality, accountability and delivery, giving our clients confidence that traffic management is handled efficiently from start to finish.

With all services managed internally, every stage is delivered through a single, aligned process. This ensures consistency, reduces miscommunication and maintains a clear standard from planning through to on-site delivery.

Our clients rely on ATMS to deliver traffic management that is dependable, responsive and easy to work with. With experienced crews and a structured approach, we provide confidence that traffic control will be implemented correctly and adapt as project conditions change.

+ 24/7 SUPPORT FOR PLANNED AND URGENT WORKS

Projects don't always run to schedule, and when conditions change, traffic management must respond immediately.

ATMS provides both pre-booked traffic management for planned works and rapid mobilisation for urgent and emergency call-outs. Our team is available 24/7, delivering on-site support when it is needed most.

Whether supporting scheduled project stages or responding to unexpected requirements, we ensure traffic control remains safe, structured and aligned with project demands.

ATMS PROVIDES BOTH PRE-BOOKED TRAFFIC MANAGEMENT AND 24/7 EMERGENCY RESPONSE.

Delivered in-house.

Accredited Traffic Controllers

Available 24/7 pre-book or emergency crews available

Structured, reliable and responsive.

Traffic management you can depend on.

+ OUR SERVICES

ATMS delivers end-to-end traffic management services across a wide range of project environments, from construction and infrastructure works through to utilities, events and urgent 24/7 call-outs.

+ ROADWORKS & TRAFFIC CONTROL

Traffic control for roadworks and live environments, ensuring safe vehicle and pedestrian movement while maintaining efficient traffic flow and site productivity.

+ CRANE & CONSTRUCTION

Coordinated traffic management supporting crane operations, construction sites and staged works, aligned with real site conditions, access requirements and project timelines.

+ VEGETATION MANAGEMENT

Traffic control for arborists and environmental works in active roadside environments, maintaining safety for crews, road users and surrounding areas.

+ UTILITY TRAFFIC MANAGEMENT & CONTROL

Reliable traffic management for utility works, supporting planned maintenance, upgrades and emergency services with safe access and controlled traffic flow.

+ RETAIL EVENT MANAGEMENT

Traffic and pedestrian management for high-traffic retail environments, supporting safe access, customer flow and operational efficiency during peak activity.

+ FETES & SPECIAL EVENTS TRAFFIC CONTROL

Structured traffic control for events and public gatherings, ensuring safe movement, controlled access and a well-managed environment for organisers and attendees.

+ EQUIPMENT HIRE

Traffic management equipment hire, providing reliable signage, infrastructure and on-site support to ensure safe and compliant project setup.

ADAMS TRAFFIC MANAGEMENT SERVICES

+ TRAFFIC MANAGEMENT - FILM & TV PRODUCTION

Film and television production moves fast, and traffic management needs to keep up.

ATMS delivers responsive, on-set traffic control that aligns with production schedules, maintains controlled access and supports the flow of filming without disruption.

Reliable, discreet and experienced in live production environments, our team works seamlessly alongside crews to ensure traffic management supports the production, not slows it down.

+ BENEFITS WORKING WITH US

24/7 RAPID MOBILISATION

Real-time response when production schedules shift

CONTROLLED ACCESS

For cast, crew and production vehicles

SAFE MANAGEMENT

Of public and high-traffic filming environments

SEAMLESS COORDINATION

Working in sync with production teams

DISCREET, EXPERIENCED CREWS

Professional teams trusted on live sets

ADAMS TRAFFIC MANAGEMENT SERVICES

+ TRAFFIC MANAGEMENT - CONSTRUCTION & CIVIL

Construction projects rely on precision, coordination and the ability to keep works moving safely without disruption.

ATMS delivers structured traffic management that aligns with staging, access and site conditions in real time. Our team works closely with contractors to ensure traffic control supports productivity while maintaining safe interaction between works, vehicles and the public. Reliable, experienced and responsive, we deliver traffic management that integrates seamlessly into active construction environments.

+ BENEFITS WORKING WITH US

24/7 RAPID MOBILISATION

Immediate response when site conditions change

SITE-ALIGNED TRAFFIC CONTROL

Supporting staging, access and workflow

SAFE WORK ZONE MANAGEMENT

Protecting workers, vehicles and the public

EXPERIENCED, RELIABLE CREWS

Confident in active construction environments

SEAMLESS SITE COORDINATION

Working directly with contractors and site teams

ADAMS TRAFFIC MANAGEMENT SERVICES

+ TRAFFIC MANAGEMENT - UTILITIES & ESSENTIAL SERVICES

Utility works require fast response, controlled environments and the ability to operate safely within live traffic conditions.

ATMS provides responsive traffic management for planned works, maintenance and urgent call-outs, ensuring safe access for crews while maintaining controlled traffic flow and minimal disruption to surrounding areas.

Adaptable and dependable, we support essential services with traffic control that keeps operations moving when it matters most.

+ BENEFITS WORKING WITH US

24/7 EMERGENCY RESPONSE

Immediate mobilisation for urgent works

LIVE TRAFFIC ENVIRONMENT EXPERTISE

Safe operation in active conditions

CONTROLLED ACCESS

Supporting crews, vehicles and equipment

MINIMAL DISRUPTION

Maintaining public access and traffic flow

RELIABLE, STRUCTURED DELIVERY

Consistent support across all works

ADAMS TRAFFIC MANAGEMENT SERVICES

+ TRAFFIC MANAGEMENT - VEGETATION MANAGEMENT

Roadside and environmental works require carefully managed traffic control to ensure safety in public and live traffic environments.

ATMS delivers reliable traffic management for arborists, vegetation contractors and environmental teams, maintaining controlled work zones and safe movement of vehicles and pedestrians.

Adaptable and responsive, our approach supports changing work areas while ensuring consistent safety and project continuity.

+ BENEFITS WORKING WITH US

SAFE WORK ZONE CONTROL

Protecting crews operating in roadside environments

ADAPTIVE TRAFFIC MANAGEMENT

Responding to changing work areas and conditions

CONTROLLED PUBLIC INTERACTION

Managing pedestrian and vehicle movement

RELIABLE, EXPERIENCED CREWS

Supporting environmental and roadside works

CONSISTENT DELIVERY

Maintaining safety and efficiency across all stages

ADAMS TRAFFIC MANAGEMENT SERVICES

+ TRAFFIC MANAGEMENT - EVENTS

Events require structured planning and precise coordination to manage the movement of people, vehicles and logistics safely and efficiently.

ATMS provides traffic management for events, activations and public gatherings, ensuring controlled access, organised flow and safe environments for both organisers and attendees.

Professional and adaptable, our team supports events of all sizes with traffic control that keeps everything running smoothly.

+ BENEFITS WORKING WITH US

PRE-EVENT PLANNING & COORDINATION

Structured traffic management from setup to delivery

PEDESTRIAN & VEHICLE FLOW CONTROL

Safe and organised movement throughout the event

CONTROLLED ACCESS

Managing entry, exit and operational logistics

ON-SITE SUPPORT

Responsive crews throughout event duration

RELIABLE EXECUTION

Delivering safe, well-managed event environments
